AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph bridging pages 4 and 5 as follows:

The equipment 10 includes:

- an upstream system 2 including a radio transceiver and electronic circuits for setting up upstream GSM links with local GSM cellular telephones 1,
- a downstream system <u>3</u> including a radio transceiver and electronic circuits for setting up a downstream GSM link with the base transceiver station 5 of the public GSM network, and
- a signal converter module 4.

Please amend the paragraph on page 7 spanning lines 24-36 as follows:

The <u>converter interface</u> module 4 extracts information specific to the mobile telephone 1 of the private network from the service signals and stores the information in the local database 8. The information includes, for each GSM terminal in the private network:

- Location information.
- The temporary mobile subscriber identifier TMSI.
- The encryption key Kc.
- The authentication key Ki.
- The result Sres of a calculation performed in the public network to authenticate the user.

AMENDMENT UNDER 37 C.F.R. § 1.111 U.S. APPLN. NO.: 09/773,729

ATTORNEY DOCKET NO. Q63000

B2 cont

- The identity of the algorithms used for encryption and authentication.
